## EXPERIENCE

### **What.it.is Creative, Austin, TX — Web Developer**

Nov 2013 - PRESENT

Build Custom, fully responsive + interactive Wordpress themes, Marketing sites, email templates, and mobile / web apps using custom UI controls, Sass, PHP, and Javascript. I am responsible for the maintenance of existing client sites and managing the lead on all front end / ui development. Daily tasks include working with the design team to create beautiful and user friendly web experiences, test display and functional issues across all modern browsers and devices.

### **Makersquare, Austin, TX — Web Developer**

July 2013 - November 2013

A student in an immersive full-time web development bootcamp. Throughout the program I learned how to build database driven web apps using Ruby on Rails, Ruby, HTML, CSS, Javascript, and jQuery. Utilized Test Driven Development using Rspec, as well as working with Git and Github for version control and project collaboration on a daily basis. Other technologies i learned along the way include: Responsive Design, SCSS(SASS), backbone.js, Ajax, Haml, Slim, Zurb Foundation, Twitter Bootstrap, API's, and the implementation of Ruby gems in a RoR project.

## SKILLS
